# Nursing and Indigenous peoples' health: reconciliation in practice

UBC Nursing Honorary Professor <u>Dr. Madeleine Kétéskwēw Dion Stout</u>, a founding member of the Canadian Indigenous Nurses' Association (CINA), and <u>Dr. Annette Browne</u> have collaborated together on research projects for over 25 years.

The path forward, these nurse-researchers believe, is rooted in reconciliation, with a focus on building mutually respectful relationships between Indigenous and non-Indigenous people. Their own long-standing partnership is a prime example.

# Senior with dementia dies after becoming dehydrated during care home quarantine

During the COVID-19 pandemic, thousands of hours of supplemental care that families provide have been sucked out of the system, leaving seniors even more vulnerable, explained <u>Dr. Jennifer Baumbusch</u>. She questioned why a designated caregiver wasn't allowed to help during quarantine — a family member trained to use PPE and screened using rapid testing. Daily Hive

### Therapeutic bed can help keep preterm newborns' brain oxygen levels stable

A medical device that has been shown to manage pain among babies born preterm can also help keep their brain oxygen levels steady during medical procedures, finds new analysis by researchers at UBC.

#### UBC News

#### Pulsating bed could prevent brain damage in premature babies

Media featured a therapeutic baby bed developed by Dr. Liisa Holsti, a professor in the department of occupational science and occupational therapy, and Dr. Karon Maclean, a professor of computer science at UBC. "The more stable their brain oxygenation is, the better for their brain

development," says researcher <u>Dr. Manon Ranger</u>, a UBC Nursing faculty who studies the health of vulnerable infants.
