New Online Tool Supports Women in Violent Relationships

A new app, myPlan Canada, could help guide women experiencing intimate partner violence to a position of better health and security. It is a free tool that offers users a personalized safety plan based on factors such as their location, their employment and family status and their proximity to their abuser.

“Very few women living in violent circumstances reach out to helplines, shelters or domestic violence programs for support,” says Dr. Colleen Varcoe, a UBC Nursing professor and co-leader of the project.

“Our hope is that this app will enable more women to consider the options that are available to them, and to take action, if necessary, to protect themselves.”
Recent Research Funding Recipients

Congratulations to the UBC Nursing faculty with recent funding successes who continue to conduct competitively funded research despite the many disruptions of the COVID-19 pandemic: The project, *Evaluation of rapid redesign and resource deployment in Long-Term Care during COVID-19*, led by Dr. Farinaz (Naz) Havaei and team (Dr. Maura MacPhee, Dr. Alison Phinney, David Keselman) was one of ten projects funded by the MSFHR COVID-19 Research Response Funding.

UBC School of Nursing assistant professor, Dr. Lillian Hung, is collaborating with SFU’s Dr. Woo Soo Kim on a recently funded NSERC Alliance grant, *Development of a Portable Mechanical Ventilator using 3D Origami Tubes to Fight COVID-19*.

UBC Nursing clinical assistant professor, Dr. Meaghan Thumath, is a recipient of the CIHR Canadian HIV Trials Network’s 2020-2021 CTN Postdoctoral Fellowship Award for her project, *Equity oriented interventions to improve substance use disorder treatment for marginalized women in Canada*.

UBC Assistant Professor of Teaching, Dr. Cheryl Segaric, is the recipient of the UBC Scholarship of Teaching and Learning (SoTL) Seed Program for her project, *The lived experience of new teachers’ navigation across the landscape of practice in nursing education: A interpretive phenomenological study.*
Strategies to Relieve End-of-Life Suffering

COVID-19 is putting unique demands on palliative care services. Medical Assistance in Dying (MAiD) is less accessible due to concerns of infection, and palliative sedation is being used more to alleviate the end of life distress association with COVID-19.

UBC Nursing professor Dr. Sally Thorne and Dr. Barb Pesut are leading work capture these evolving trends as they unfold during this pandemic context.

Jim Mann receives UBC Honorary Degree

Congratulations to Jim Mann, a longtime patient research partner with Dr. Alison Phinney and Dr. Lillian Hung, on being awarded an honorary Doctor of Laws degree from UBC. Jim has dedicated himself to countering negative stereotypes and promoting an inclusive society in which persons with dementia can make an active and meaningful contribution.
APSC Rising Stars

Congratulations to 2020 APSC Rising Stars Nikko Asistio and Arlene Singh - graduates of the MHLP Clinical Education program. Nikko is a Clinical Operations Manager in Fraser Health Authority, overseeing two Urgent Primary Care Centres in the lower mainland. Arlene is a Clinical Planner for Virtual Health with Vancouver Coastal Health with 8 years of experience as an emergency nurse.

Gillian McKay, BSN'09

UBC ALUMNI STORIES:
Gillian McKay, BSN'09, currently works as a Humanitarian Health Advisor in London, U.K. following her first role as a Registered Nurse at VGH. Gillian shares how the current COVID-19 pandemic is shaping her career and provides advice to the Class of 2020 on how to navigate uncertain times.
Adopting mid-course feedback in an online course

Dr. Farinaz Havaei is an Assistant Professor at the School of Nursing at the University of British Columbia.

Parents with children under 18 reporting troubling tolls to their mental health: survey
News 1130 highlighted a new nationwide survey led by UBC Nursing assistant professor Dr. Emily Jenkins and the Canadian Mental Health Association, that showed the COVID-19 pandemic has caused intense
stress and disruption for all Canadians. It found 1 in 10 of these parents had thoughts or feelings of suicide during the pandemic.

News 1130, CityNews

Pandemic’s mental health toll is hammering marginalized people
A new report released today by UBC researcher Dr. Emily Jenkins and the Canadian Mental Health Association found that 39 per cent of people in Canada say their mental health has declined due to COVID-19.

CTV

Nurses working in acute care report high levels of stress
The BC Nurses Union has commissioned another study on psychological health and safety, which is looking at nurses’ mental health before and after the pandemic. The study is being led by Dr. Farinaz (Naz) Havaei in the UBC School of Nursing.

Vancouver Sun

Study shows high levels of burnout, PTSD, injury among B.C. nurses pre-pandemic
A UBC study, conducted by Dr. Farinaz (Naz) Havaei, was commissioned by the BC Nurses Union. The study found high levels of burnout, PTSD, and workplace injury plagued nurses working in acute care, long-term care, and community care settings.

News 1130

Time-out room to 'yell or cry' created for frontline workers at Vancouver hospital
Media interviewed UBC nursing alumni Lara Gurney and Lori Quinn about ways to reduce fatigue and burnout among healthcare staff.

CTV, Daily Hive

This B.C. hospital just got a 'time-out' room and staff use it to scream and cry
UBC nursing alumni Lara Gurney and Lori Quinn were interviewed about their project, the "wobble room," a time-out space at Vancouver General Hospital that is open to healthcare staff to unwind, to vent or to connect as needed, at any time of day.
