

A circular portrait of Dr. Charlene Ronquillo, a woman with long brown hair and glasses, smiling. The background of the portrait is a blurred outdoor setting with a wooden fence and greenery. The portrait is set against a dark blue background with white radiating lines.

Dr. Charlene Ronquillo

"There is no meaningful digital health future without nursing - it is our time to step up and drive."

MSN 2011
PhD 2021

2023 Recent Alumni Award

Dr. Charlene Ronquillo is a new scholar and emerging national and international leader in health information and technology systems. Her research focus is a rare combination of health informatics and health equity. She works to ensure that AI and health technologies are carefully designed and implemented to include those populations that are regularly overlooked in digital health interventions.

Charlene is highly collaborative and generous with her time, willing to provide education and share her expertise. Her nominators extol her program of research, her abilities as an educator, her awards, her popularity as a public speaker, and much more. She has demonstrated an ability to influence change at the health systems and practice levels such that her contributions at this early stage of her career are truly inspiring.

As healthcare advances toward a highly digital future, our students will be lucky to be guided by the example of Dr. Charlene Ronquillo, our choice for the 2023 School of Nursing Recent Alumni Award.
